Prepared for institutional, CSR, community, and donor review

1. Executive Summary

On 16 August 2026, The Aligarh Renaissance conducted a targeted community empowerment and awareness drive in Shahanshah Baad, Aligarh. The initiative was designed around a practical premise: formal education becomes more effective when families can also access legal awareness, digital independence, government services, and actionable career information.

The programme combined door-to-door outreach with an on-site consultation hub at Mansha Public School. The team engaged approximately 150–200 residents across four service verticals: digital fraud prevention, government welfare scheme navigation, official document support, and youth career guidance. In parallel, the survey team recorded socio-economic observations to identify barriers affecting income security, education continuity, digital access, and public-service delivery.

1.1 Headline Impact

Approximately 180 individuals reached; 70%+ female engagement; 150+ residents oriented on cyber safety; 60+ scholarship guidance cases; 30+ pension and welfare cases screened; direct expenditure of ₹9,000.

1.2 Key Messages

WHAT THE FIELD EVIDENCE SAYS

- Residents showed strong demand for trustworthy, zero-cost guidance on scholarships, pensions, documentation, and cyber-fraud reporting.
- Women were the primary respondents during door-to-door visits, indicating the importance of women-centred community facilitation.
- The official National Cybercrime Reporting Portal and helpline 1930 should be central to future cyber-safety sessions.
- The project model is low-cost, volunteer-led, and suitable for replication across additional wards, subject to stronger case-tracking and follow-up systems.

2. Project Profile

Dimension	Project record
Theme	Grassroots awareness, welfare linkage, and cyber safety
Location	Shahanshah Baad, Jamalpur, Aligarh
Ward	Ward No. 79
Venue	Mansha Public School
Primary audience	Women, senior citizens, youth, and low-income households
Delivery model	Door-to-door outreach plus central consultation hub
Implementation date	16 August 2026

3. Organizational Compliance & Credentials

The source project brief reports that The Aligarh Renaissance maintains administrative and financial credentials intended to support transparent institutional and CSR engagement. The following items should be annexed with documentary proof before external publication or donor submission.

COMPLIANCE CHECKLIST

- Registered under the Societies Registration Act, 1860 – Section 7(2), as reported in the project brief.
- Tax exemption credentials reported under Sections 12A and 80G of the Income Tax Act. The exact certificate wording and current validity should be attached in an annexure.
- Government and institutional portal affiliations reported through NGO Darpan and relevant ministries. The Darpan Unique ID and supporting registration records should be cross-checked before final circulation.

4. Socio-Economic Profile: Shahanshah Baad

Shahanshah Baad is described in the field brief as a high-density residential locality in the Jamalpur area, adjacent to Aligarh Muslim University. The proximity to a premier institution creates an “AMU Proximity Paradox”: educational and institutional resources are geographically close, while many households continue to face barriers related to income, documentation, digital access, and progression beyond basic schooling.

Area of observation	Field description
Economic landscape	Predominantly informal livelihoods, including lock-manufacturing micro-units, brass craft, battery-rickshaw driving, and small retail.
Education and demography	Large youth population, multi-generational households, steady primary enrolment, and frequent upper-secondary or higher-education dropouts.
Civic infrastructure	Open drainage, waterlogging near the Jamalpur Nala route, inconsistent drinking water availability, and uneven electrical distribution were reported.
Access barrier	Limited awareness of official government portals, application tracking, and public grievance mechanisms.

5. Government Data & Public-Service Context

The local findings should be read alongside official public-service systems and government survey frameworks. Government sources provide the macro context; the project's own survey records provide the ward-level observations. These two evidence types should not be presented as interchangeable.

OFFICIAL CYBER-SAFETY ACTION BOX

For financial cyber fraud, citizens should report immediately through the National Cybercrime Reporting Portal and call the Government of India cybercrime helpline 1930. The I4C portal also provides complaint tracking and connects financial-fraud reporting with banks, payment intermediaries, and wallets. [1]

OFFICIAL EDUCATION AND EMPLOYMENT PATHWAYS

The National Scholarship Portal is a Government of India one-stop platform for scholarship applications and related processing. The National Career Service is the official employment and career-services platform for jobseekers, employers, and counsellors. [2] [3]

HOW TO CITE LOCAL DATA RESPONSIBLY

The figures in this report—such as 70%+ female engagement, 150–200 residents reached, household income clusters of ₹11,000–₹25,000, and 5–7 member households—are presented as project field records, not as official census estimates. They should be accompanied by the survey instrument, sample size, date, and method in the annexure.

5.1 Government-Linked Indicators for Future Monitoring

Indicator	Official source / action	Use in future drives
Cyber-fraud reporting	I4C / National Cybercrime Reporting Portal; helpline 1930 [1]	Record awareness, reports filed, and case follow-up status.
Scholarship access	National Scholarship Portal [2]	Record OTR creation, application submission, acknowledgement, and rejection reasons.
Employment and skills	MoSPI PLFS and National Career Service [3] [4]	Record youth counselling, registrations, referrals, and training linkage.
Welfare and pensions	Relevant central/state welfare portals and local authorities	Record document gaps, application status, bank linkage, and resolution dates.

6. Field Findings

1. INTERMEDIARY EXPLOITATION AND OVERCHARGING

Residents reported cyber cafés charging ₹300–₹500 for basic online forms that are designed to be free, with some applicants not receiving acknowledgement numbers or receipts.

2. DIGITAL FRAUD EXPOSURE

Residents described fake bank calls and unauthorised transfers. The camp introduced OTP safety and the official 1930 reporting route.

3. EDUCATION EXPENDITURE UNDER INCOME PRESSURE

Families with tight daily budgets nevertheless prioritised affordable private schooling, reflecting demand for perceived quality and continuity.

4. PENSION DISRUPTION

Older residents reported delayed or stalled pension applications, often linked to missing documents, bank-linkage issues, or limited ability to track applications.

5. SUPPORT FOR WIDOWS & WELFARE ASSISTANCE

During the outreach drive, our team engaged closely with several local widows who lacked awareness of relevant government welfare and pension schemes. Beyond initial counselling, volunteers provided crucial technical and procedural guidance on securing their late husband's death certificate—walking them through required documentation, verification steps, and application channels to ensure long-term access to institutional support

7. Operational Roadmap & Deployment Methodology

Phase	Purpose	Key activity
Phase 1	Volunteer mobilization	Public announcements, registration, orientation, and alignment on local realities.
Phase 2	Operational planning	Campaign priorities, street-level mapping, and delivery goals by service vertical.
Phase 3	Team formation and logistics	Specialised teams for awareness, survey, logistics, and coordination / public relations.
Phase 4	Field execution and analysis	Door-to-door coverage, consultation hub, data compilation, debriefing, and documentation.

7.1 Team Responsibilities

FOUR-TEAM DELIVERY STRUCTURE

- Presentation & Awareness Team: community engagement on schemes, cyber safety, and career options.
- Data Collection & Survey Team: household socio-economic metrics, qualifications, and grievance details.
- Logistics & Setup Team: canopy, banners, seating, refreshments, and hardware.
- Ground Coordination & Public Relations Team: venue coordination, public announcements, and street-level timing.

Because morning footfall was lower than expected, the team adapted by expanding door-to-door outreach across adjacent alleyways and reconvening at the school hub for data compilation and debriefing. This adaptive approach should be retained in future standard operating procedures.

8. Quantitative Survey Data Summary

Metric category	Survey finding / project record
Gender distribution	70%+ female engagement; women were the primary respondents during door-to-door visits.
Literacy and education	Many surveyed adults reported no formal schooling or education limited to Classes 2–8; 10th/12th completion was lower among older groups.
Household composition	Average household size reported at 5–7 members, often including elderly dependents.
Income distribution	Reported monthly household incomes clustered between ₹11,000 and ₹25,000, with informal work and small pensions as key sources.

9. Project Impact & Performance Matrix

Parameter / KPI	Target	Achievement	Outcome indicator
Community outreach	150 households	150–200 individuals	70%+ female representation engaged
Cyber-safety education	100 residents	150+ residents oriented	1930 helpline and fraud-reporting route explained
Scholarship awareness	40 students	60+ guidance cases	Zero-cost application procedures explained
Pension and welfare audit	20 senior citizens	30+ cases screened	Stalled pensions and reported charges catalogued

10. Financial Breakdown & Cost Efficiency

Item / service	Cost (INR)
Outreach canopy (1 units)	₹6,000
Banner and certificate printing	₹500
Volunteer food and lunch	₹1,500
Logistics and miscellaneous expenses	₹1,000
TOTAL DIRECT EXPENDITURE	₹9,000

COST-EFFICIENCY SNAPSHOT

Total expenditure: ₹9,000 | Beneficiaries reached: approximately 180 | Indicative cost per beneficiary: ₹50 per person. This calculation is based on project records and should be presented as an indicative efficiency metric, not a universal cost benchmark.

10.1 Institutional In-Kind Contributions

NON-CASH SUPPORT

- Venue and infrastructure were reported as provided at no charge by Mansha Public School through management members Mr. Salman and Mr. Sartaj, AMU alumni.
- Community outreach support, local guidance, trust-building, and announcements were facilitated by Mr. Saeed, Imam, AMU Mosque.

11. UN Sustainable Development Goals Alignment

SDG goal	Project intervention and outcome
SDG 1: No Poverty	Linkage to pensions, widow benefits, and welfare schemes to strengthen baseline income security.
SDG 4: Quality Education	Guidance on NSP and career resources to reduce avoidable education discontinuity.
SDG 8: Decent Work and Economic Growth	Financial literacy, cyber-safety instruction, and awareness against intermediary exploitation.
SDG 10: Reduced Inequalities	Doorstep assistance for low-income and minority-concentrated households.

12. Risk Assessment & Mitigation Matrix

Identified risk / bottleneck	Ground reality observed	Mitigation / strategic action
Intermediary exploitation	Cyber cafés charging ₹300–₹500 for free scholarship forms.	Community-led self-help groups, CSC links, receipt discipline, and zero-cost guidance.
Digital-fraud vulnerability	Limited understanding of OTP safety and fraud recovery.	Repeated orientation on 1930, immediate reporting, and simple printed checklists.
Administrative delays	Pensions stalled due to bank or document-linkage errors.	Dedicated case-tracking log and escalation pathway with local authorities.

13. Key Takeaways for CSR and Institutional Partners

PARTNER ACTION AGENDA

- Invest in follow-up, not only one-day outreach: unresolved welfare and fraud cases require case ownership and tracking.
- Fund simple printed literature and help-desk infrastructure so residents can independently use official portals.
- Support youth volunteer training as a local capability-building intervention.
- Use a standardised monitoring framework that records reach, demographic participation, applications initiated, acknowledgements received, and cases resolved.

14. Founder's Vision & Scalability Roadmap

“Communities often emphasise the importance of formal education, but without practical awareness, digital literacy, and actionable skills, formal schooling alone cannot solve systemic stagnation. A single-day camp cannot resolve every structural challenge in a neighbourhood; its real purpose is to spark an idea, break the silence around administrative exploitation, and inspire individuals to take charge of their rights.”

The Aligarh Renaissance is positioned not merely as an organisation but as a movement to build self-sustaining youth leaders within each locality. The proposed scale pathway is to refine the Shahanshah Baad model, train local youth, and package the approach into a replicable grassroots community-development module.

— Azfar Ali Khan, Director & Founder, The Aligarh Renaissance

15. Sustainability & Next Action Items

Priority	Action	Expected result
1	Establish targeted case follow-ups for cyber-fraud reports and stalled pension applications.	More cases moved from awareness to documented resolution.
2	Distribute simplified CSC and NSP guidance literature.	Reduced dependence on unverified intermediaries and fewer avoidable fees.
3	Standardise the camp module into a CSR toolkit.	Replicable multi-ward implementation across Aligarh district.

16. Acknowledgments

The Aligarh Renaissance extends sincere gratitude to the institutional, community, and volunteer partners who supported the drive.

- Institutional leadership: **Mr. Salman and Mr. Sartaj** for venue access and logistical backing.
- Community leadership: **Mr. Saeed** for encouragement and local guidance.
- Volunteer team: **Labeeba Idrisi, Mahira, Namra, Zehra Alam, Rutba Azeem, Samiya Bi, Zaara Mashkoor, Rahat Parween, Aliya Tabasum, Labib Anwar, Mohd. Arshan, Mohd. Ejaz, and Ziya Khan.**
